Description

This groundbreaking new text explains and documents the scientific basis of chronic pain in Joint Hypermobility Syndrome (JHS) and other heritable disorders of connective tissue from the physiological, epidemiological, genetic and clinical viewpoints.

Features

- Comprehensively relates practical therapy to the nature of the underlying pathology
- Covers in one single text both the scientific and practical management aspect of Joint Hypermobility Syndrome and its allied pathologies
- Contributions from over 30 leading international experts
- Multidisciplinary approach will support all health professionals working in this field
# Table of Contents

## Prologue
Sarah Gurley-Green

## SECTION 1: CLINICAL SCIENCE

1. The heritable disorders of connective tissue: epidemiology, nosology, and clinical features  
   Alan J Hakim, Fransiska Malfait & Anne De Paepe
2. What is the joint hypermobility syndrome? - JHS from the cradle to the grave  
   Rodney Grahame with contributions from Jamie Bravo, Nathan Hasson, Rosemary Keer & Susan M Maillard
3. The physiology of pain  
   Maliha Shaikh, Alan J Hakim & Nicholas Shenker
4. Anxiety disorders, their relationship to hypermobility and their management  
   Rocio Martin-Santos, José Alexandre Crippa & Anthony Bulbena
5. Fibromyalgia and hypermobility  
   Anisur Rahman & Andrew Holman
6. Neuromuscular physiology in joint hypermobility  
   Fares Haddad & Rohit Dhawan
   i. Cardiovascular autonomic dysfunction and chronic fatigue in fibromyalgia and joint hypermobility syndrome  
      Jaime F. Bravo, Gonzalo Sanhueza, Alan J Hakim
   ii. Bowel dysfunction in joint hypermobility syndrome and fibromyalgia  
      Adam D Farmer & Qasim Aziz
   iii. Gastrointestinal manifestations of opioid therapy in chronic pain syndromes  
       Adam D Farmer & Qasim Aziz
   iv. Proprioceptive dysfunction in JHS and its management  
       William R Ferrell & Peter W Ferrell

## SECTION 2: THERAPY

7. Pharmacotherapy  
   7i Pharmacotherapy in fibromyalgia  
      Andrew J Holman
   7ii Pharmacotherapy in joint hypermobility syndrome  
      Howard A Bird
8. Pain management and cognitive behavioural therapy  
   H. Clare Daniel
9. Physiotherapy and occupational therapy in the hypermobile adult  
   Rosemary Keer & Katherine Butler
10. Physiotherapy and occupational therapy in the hypermobile adolescent  
    Alison Middleditch
11. Physiotherapy and occupational therapy in the hypermobile child  
    Susan M Maillard & Julie Payne
12. Regional complications in joint hypermobility syndrome  
    a. The shoulder joint  
       Anju Jaggi & Simon M Lambert
    b. The hip joint  
       Marc George & Marcus JK Bankes
    c. The knee  
       Fares Haddad & Rohit Dhawan
    d. The hypermobile foot  
       Ron S McCulloch & Andrew Redmond with contribution from Rosemary Keer
    e. Pregnancy and the pelvis  
       Rodney Grahame & Rosemary Keer
    f. The cervical spine and jaw  
       a. The cervical spine  
          Rosemary Keer
       b. Temporomandibular joint - physiotherapy management  
          Lynn Bryden
       c. Temporomandibular joint - surgical intervention  
          Waseem Jerjes & Colin Hopper
    g. The thoracolumbar spine  
       Kaye Walls
13. Fitness, sport, performance and the principles of rehabilitation  
    Jane Simmonds

---

**Extract from the Foreword**

The authors have produced the definitive work on the JHS. This monograph embraces many aspects of current understanding of the condition, ranging from manifestations, through pathogenesis to management. The fact that more than 30 experts in different fields have made contributions emphasises the complexity and the extensive ramifications of the syndrome.

This magisterial monograph will constitute the foundation upon which many future developments in the understanding of the JHS will be based, and represents eloquent testimony to the endeavours of the Editors and colleagues in this field.

Emeritus Professor Peter Beighton OMB, MD., Ph.D., F.R.C.P., F.R.S.S.A.
