# Hypermobility, Fibromyalgia and Chronic Pain

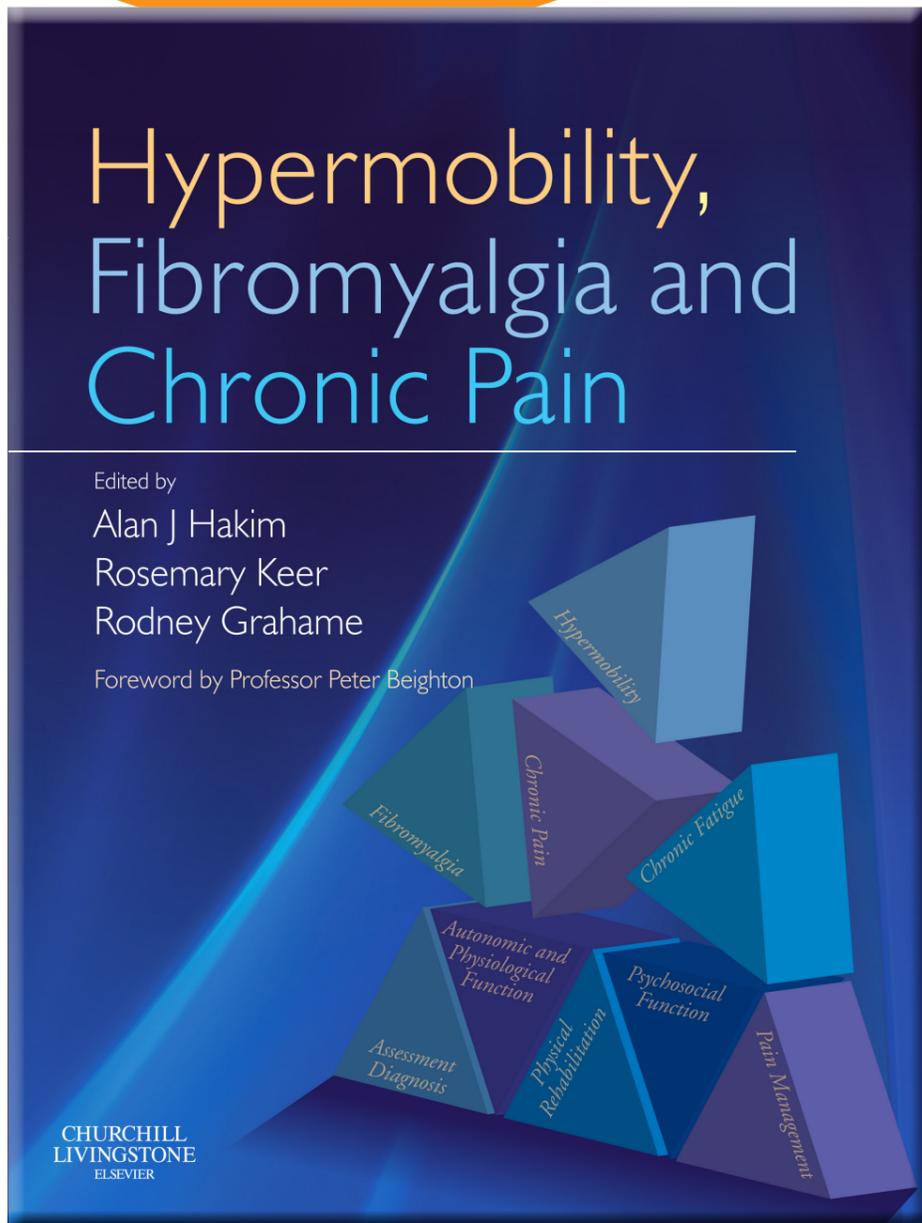

Edited by **Alan Hakim,**  
**Rosemary Keer** and  
**Rodney Grahame**

Foreword by **Professor**  
**Peter Beighton**

336 pages  
Paperback

**£39.99 / €45.99 / \$86.00**

**9780702030055**

## Description

This groundbreaking new text explains and documents the scientific basis of chronic pain in Joint Hypermobility Syndrome (JHS) and other heritable disorders of connective tissue from the physiological, epidemiological, genetic and clinical viewpoints.

## Features

- Comprehensively relates practical therapy to the nature of the underlying pathology
- Covers in one single text both the scientific and practical management aspect of Joint Hypermobility Syndrome and its allied pathologies
- Contributions from over 30 leading international experts
- Multidisciplinary approach will support all health professionals working in this field

## Extract from the Foreword

*The authors have produced the definitive work on the JHS. This monograph embraces many aspects of current understanding of the condition, ranging from manifestations, through pathogenesis to management. The fact that more than 30 experts in different fields have made contributions emphasises the complexity and the extensive ramifications of the syndrome.*

*This magisterial monograph will constitute the foundation upon which many future developments in the understanding of the JHS will be based, and represents eloquent testimony to the endeavours of the Editors and colleagues in this field.*

Emeritus Professor Peter Beighton OMB, MD., Ph.D., F.R.C.P., F.R.S.S.A.

## Table of Contents

Prologue  
Sarah Gurley-Green

### SECTION 1: CLINICAL SCIENCE

1. The heritable disorders of connective tissue: epidemiology, nosology, and clinical features  
Alan J Hakim, Fransiska Malfait & Anne De Paepe
2. What is the joint hypermobility syndrome? - JHS from the cradle to the grave  
Rodney Grahame with contributions from **Jaime F Bravo**, Nathan Hasson, Rosemary Keer & Susan M Maillard
3. The physiology of pain  
Maliha Shaikh, Alan J Hakim & Nicholas Shenker
4. Anxiety disorders, their relationship to hypermobility and their management  
Rocio Martin-Santos, José Alexandre Crippa & Anthony Bulbena
5. Fibromyalgia and hypermobility  
Anisur Rahman & Andrew Holman
6. Neuromuscular physiology in joint hypermobility
  - 6i Cardiovascular autonomic dysfunction and chronic fatigue in fibromyalgia and joint hypermobility syndrome  
**Jaime F. Bravo**, Gonzalo Sanhueza, Alan J Hakim
  - 6ii Bowel dysfunction in joint hypermobility syndrome and fibromyalgia  
Adam D Farmer & Qasim Aziz
  - 6iii Gastrointestinal manifestations of opioid therapy in chronic pain syndromes  
Adam D Farmer & Qasim Aziz
  - 6iv Proprioceptive dysfunction in JHS and its management  
William R Ferrell & Peter W Ferrell

### SECTION 2: THERAPY

7. Pharmacotherapy
  - 7i Pharmacotherapy in fibromyalgia  
Andrew J Holman
  - 7ii Pharmacotherapy in joint hypermobility syndrome  
Howard A Bird
8. Pain management and cognitive behavioural therapy  
H. Clare Daniel
9. Physiotherapy and occupational therapy in the hypermobile adult  
Rosemary Keer & Katherine Butler
10. Physiotherapy and occupational therapy in the hypermobile adolescent  
Alison Middleditch
11. Physiotherapy and occupational therapy in the hypermobile child  
Susan M Maillard & Julie Payne
12. Regional complications in joint hypermobility syndrome
  - 12i The shoulder joint  
Anju Jaggi & Simon M Lambert
  - 12ii The hand  
Katherine Butler
  - 12iii The hip joint  
Marc George & Marcus JK Bankes
  - 12iv The knee  
Fares Haddad & Rohit Dhawan
  - 12v The hypermobile foot  
Ron S McCulloch & Andrew Redmond with contribution from Rosemary Keer
  - 12vi Pregnancy and the pelvis  
Rodney Grahame & Rosemary Keer
  - 12vii The cervical spine and jaw
    - a The cervical spine  
Rosemary Keer
    - b Temporomandibular joint - physiotherapy management  
Lynn Bryden
    - c Temporomandibular joint - surgical intervention  
Waseem Jerjes & Colin Hopper
  - 12viii The thoracolumbar spine  
Kaye Walls
13. Fitness, sport, performance and the principles of rehabilitation  
Jane Simmonds
